For the 3rd Quarter of 2023

Part 2 Disclosure Details

1. Capital adequacy

Capital management Policy and objective

To ensure that the capital is within the company risk appetite, the company has the assessment policy and stress test under Own Risk and Solvency Assessment guideline and the capital management plan in line with risk assessment and Early Warning System for major activities and significant risk factors.

Capital management processes

For regular monitoring and reviewing risks which will impact the operational targets, the Company determines measurements under assumptions that the capital has not been lower than capital adequacy ratio required by the Office of Insurance Commission, by testing risk factors such as interest rate, funds market and economy scenarios with value at risk (VaR).

For implementation according to situations, the Company will assess, monitor and test the sensitivity and stress of risk factors in response to risks as the capital management plan, source of funds and measurements appropriately and promptly. And, the Company has determined the roles and responsibilities of related unit functions and prepared unit functions' risk management plan in line with the Company's risk appetite level. It has also established the management and Risk Committee, reported to the Board of Directors, and communicated to employees for acknowledgement.
